

ID Trade Email Performance Report

Interior Define Trade Program — Email Channel

Knowledgebase + GA4 data · Jul 2024 – May 2026 · Generated May 26, 2026

TL;DR

Trade emails are a small but high-value channel. They represent **3% of ID email sessions** but generate **\$22 revenue per session vs \$16 for consumer** — a 41% efficiency advantage. The welcome series alone has driven ~\$45K in revenue and averages **64.5% open rates**. The list has grown from ~3K to ~22K over the past year, and engagement has stabilized at a healthy 43–47% open rate. July 2025 and May 2026 are the two standout revenue months, both driven by private/exclusive sale events.

1. Program Overview

Campaigns analyzed	182 email campaigns (Jul 2024 – May 2026)
Campaigns with send data	161
Average list size	~16,200 (current: ~22,000)
Channel	Braze email — ID workspace, "TRADE" in campaign name
Revenue data source	GA4 last-click attribution

2. Engagement Performance

Overall Benchmarks

Metric	Trade	Context
Avg Open Rate	43.4% (median 46.2%)	Healthy — consumer ID ~30%
Avg Click Rate	1.21% (median 0.82%)	
Unsubscribe Rate	0.31% avg	Low churn for a trade audience
OR Range	11.8% – 72.3%	Wide — driven by content type
CR Range	0.28% – 12.6%	

Triggered vs Batch

Type	Count	Avg OR	Avg CR
Triggered (Welcome series)	5 canvas steps	64.5%	4.3%
Batch campaigns	156	42.7%	1.11%

The welcome series dramatically outperforms batch on every metric and is the single best-performing asset in the program (see Revenue section).

Designed vs Plain-Text (Batch)

Format	Count	Avg OR	Avg CR
Designed	87	44.9%	0.87%
Plain-Text	33	44.8%	1.61%

Open rates are essentially identical. PT outperforms on clicks — trade professionals respond to clear, direct copy.

Performance by Category (Batch)

Category	n	Avg OR	Avg CR
Editorial	10	50.8%	1.21%
Reminder	59	43.3%	0.88%
Other	40	44.4%	1.62%
Sale/Promo	32	41.9%	1.31%
Product Launch	20	40.1%	1.21%

Editorial sends lead on open rate; sale/promo is the lowest — trade customers are not primarily discount-motivated.

Quarterly Engagement Trend

Quarter	n	Avg OR	Avg CR	Avg List Size
2024 Q3	10	43.1%	2.37%	~2,900
2024 Q4	13	38.7%	2.17%	~9,100
2025 Q1	14	29.0%	1.42%	~17,300
2025 Q2	15	29.7%	0.80%	~19,100
2025 Q3	23	48.5%	1.04%	~23,300
2025 Q4	23	47.5%	0.50%	~19,900
2026 Q1	34	45.1%	0.53%	~19,900
2026 Q2	24	47.2%	1.50%	~9,700

Note on Q1–Q2 2025 dip: Open rates dropped to 29% as the list scaled rapidly from ~3K to ~20K — likely list quality dilution from new signups that hadn't yet engaged. From Q3 2025 onward, ORs recovered strongly to 45–48%, indicating the list stabilized. The Q4 2025 click rate drop (0.50%) is worth watching; 2026 Q2 is bouncing back to 1.50%.

3. Revenue Performance (GA4 Last-Click)

Trade vs Consumer — Head to Head

Metric	Trade	Consumer
Sessions	20,561	664,654
Purchases	149	3,632
Total Revenue	\$454,101	\$10,407,100
AOV	\$3,048	\$2,865
Revenue / Session	\$22.09	\$15.66

Trade is 3% of email sessions but 4.4% of email revenue, with a **\$183 higher AOV** and **41% better revenue efficiency per session**. Trade customers buy bigger — they're sourcing for projects.

Monthly Revenue Trend

Month	Sessions	Purchases	Revenue	AOV
Jul 2024	487	3	\$6,008	\$2,003
Aug 2024	820	5	\$16,995	\$3,399
Sep 2024	563	8	\$14,145	\$1,768
Oct 2024	601	2	\$4,802	\$2,401
Nov 2024	704	10	\$26,826	\$2,683
Dec 2024	486	2	\$4,503	\$2,251
Jan 2025	1,580	11	\$25,582	\$2,326
Feb 2025	643	10	\$27,511	\$2,751
Mar 2025	484	7	\$23,752	\$3,393
Apr 2025	587	1	\$2,304	\$2,304
May 2025	818	9	\$26,901	\$2,989
Jun 2025	772	4	\$8,746	\$2,186
Jul 2025	2,514	15	\$97,489	\$6,499

Month	Sessions	Purchases	Revenue	AOV
Aug 2025	1,443	5	\$13,410	\$2,682
Sep 2025	825	10	\$23,896	\$2,390
Oct 2025	830	4	\$12,426	\$3,107
Nov 2025	674	4	\$13,843	\$3,461
Dec 2025	768	4	\$8,677	\$2,169
Jan 2026	950	4	\$12,644	\$3,161
Feb 2026	985	6	\$14,003	\$2,334
Mar 2026	660	1	\$1,649	\$1,649
Apr 2026	1,138	7	\$15,926	\$2,275
May 2026	1,229	17	\$52,062	\$3,062

Top Revenue-Driving Campaigns

Rank	Campaign	Revenue	Purchases	AOV
1	Private Trade Sale — Geotargeted PT (7/11/25)	\$54,638	3	\$18,213
2	Login Update Email (1/3/25)	\$45,680	17	\$2,687
3	Trade Welcome Email — triggered series	\$44,852	18	\$2,492
4	35% First Time Ever PT (5/4/26)	\$23,210	8	\$2,901
5	MDW Sale Template (May 2026)	\$22,877	8	\$2,860
6	PDW Early Access (2/7/25)	\$17,972	6	\$2,995
7	Trade Welcome T1 V2 — triggered	\$15,201	7	\$2,172
8	Trade Perks Appreciation Launch (2/2/26)	\$7,788	3	\$2,596

4. What's Working

■ **Welcome / Triggered Series**

The best single asset in the program. 5 canvas steps averaging **64.5% OR and 4.3% CR** — and \$44,852 in attributed revenue (18 purchases, #3 all time). Welcome T1 alone: **72.3% OR / 12.6% CR**. Ensure this series is always on and fully optimized.

■ **Private / Exclusive Sale Events**

July 2025 Private Sale was the single best revenue month (\$97K). The top-performing subject line: *"You're Invited: Private Trade Sale — 25% Off Just for Designers"* → 56.5% OR. Exclusivity framing resonates strongly with trade professionals.

■ **Plain-Text Emails for Conversions**

PT clicks are nearly 2× designed (1.61% vs 0.87%). Some of the highest-revenue campaigns are PTs. Trade customers respond to clear, direct, text-forward communication — PT is not a downgrade for this audience.

■ **Product-Pull Content (Swatch / In-Stock)**

Only 3 swatch/in-stock emails in the dataset but they average **3.1% CR** — well above the 1.21% overall average. Trade customers are actively sourcing and click to request samples. More of this would likely perform.

■ **Cross-Brand Send Efficiency**

Cross-brand trade emails (featuring ID + CZ + TI + STF) have similar performance to ID-only sends (44.2% OR vs 42.3%) at similar list sizes. Good reach efficiency with no material engagement penalty.

5. What to Watch / Fix

■ ■ **All-Caps and Vague Promo Subject Lines Underperform**

The weakest subject lines share a pattern — generic urgency, all-caps, or hype-first framing:

Subject	OR
"Introducing Contract Grade by Interior Define"	11.8%
"You're Invited: SALE EARLY ACCESS"	15.8%
"Just dropped: trade-exclusive discounts!"	16.8%
"HAPPENING NOW: 25% OFF"	26.3%

Trade professionals expect substantive, direct communication. Specificity and exclusivity (private, first, just for designers) work; hype and caps don't.

■ ■ **April 2025 and March 2026 Were Near-Zero Revenue Months**

- April 2025: 587 sessions, only **1 purchase / \$2,304**
- March 2026: 660 sessions, only **1 purchase / \$1,649**

High engagement, low conversion — these months likely had sparse offer calendars or drove traffic to pages that weren't converting. Worth a retrospective look at what ran those months.

■ ■ **Q4 2025 Click Rate Drop (0.50%)**

After recovering strongly in Q3 2025, clicks fell to 0.50% in Q4 — the lowest since the list scaled. 2026 Q2 is recovering (1.50%). Check whether Q4 2025 leaned too heavily on reminder/sale content without enough product or editorial variety.

■ ■ **Active A/B Tests Awaiting Results**

8 campaigns with no analytics yet from the ongoing Lapsed Re-Activation and Cross-Brand Version A/B tests (sent 5/5 and 5/12). Follow up once data is in — results will inform list health strategy.

6. Recommendations

Priority	Action
■ High	Protect and optimize the Welcome series — it's #3 in all-time revenue. Audit it quarterly, keep it fully on.
■ High	Run more private/exclusive sale events — July 2025 was \$97K. This format (\$6,499 AOV!) is not one-off; replicate with holiday and fall sale.
■ Medium	Increase swatch / in-stock sends — only 3 in 2 years, all strong. Trade customers are sourcing. A monthly cadence of what's available ships quickly would drive consistent clicks and conversion.
■ Medium	Default to PT for sale sends — near-identical ORs, nearly 2× the click rate. Save design budget for editorial and product launch moments.
■ Medium	Fix subject line patterns for promo sends — stop using all-caps and generic "invited / just dropped" framing. Use specificity: "35% — <i>First Time Ever for Trade</i> " outperforms " <i>HAPPENING NOW: 25% OFF</i> " by 30+ OR points.
■ Low	Investigate the April 2025 / March 2026 conversion gaps — sessions were there, purchases were not. Landing page or offer mismatch.

Data sources: Braze campaign knowledgebase (engagement metrics) + Snowflake GA4 last-click attribution (revenue). Trade campaigns identified by "TRADE" in Braze campaign name within the ID workspace. Revenue figures are GA4 last-click — not time-window attributed.
